

Danzer Group Controlled Wood Policy

Danzer Group commits to source timber from own and third party forests in an environmentally responsible manner. Our main goal is to procure only from sustainably managed forests.

Danzer Group has implemented and maintains a *Company Verification Program* that verifies sourcing of Controlled Wood avoids the following categories:

1. Illegally harvested wood
2. Wood harvested in violation of traditional and civil rights
3. Wood harvested in forests where high conservation values are threatened by management activities
4. Wood harvested in forests being converted to plantations or non-forest use
5. Wood from forests in which genetically modified trees are planted

This process is continuously and independently certified by qualified third party auditors as stated in the FSC Standard for Controlled Wood.

Compliance with the FSC Standard for Controlled Wood will be ensured in order to make claims and sales under this policy.

This policy was adopted by the Executive Board Representative for Environment/ Procurement and the Group's Environmental Coordination. It is valid as of 25 March 2008.
